Alexander Jackson

PRODUCT DEVELOPMENT | SOFTWARE ENGINEERING | ANALYTICS

(805) 350-1654 | awjackson00@gmail.com | linkedin.com/in/alexander-jackson5 | awjackson00.github.io

PROFESSIONAL SUMMARY

Technical product and analytics professional with an MBA, M.S. in Data Science, and B.A. in Computer Science. Built Python software and consumer-facing applications, improved cloud and database infrastructure, and translated stakeholder needs into measurable workflow gains.

PROFESSIONAL EXPERIENCE

Willamette Angel Fund / Oregon Venture Fund | Angel Fund Investment Analyst — Aug 2025 - Aug 2026

- Evaluated early-stage startups through product-market, competitive, growth, and financial diligence to assess business models and market opportunity.
- Synthesized findings on customer needs, differentiation, and investment risks into structured recommendations for fund discussions.

Marion Berries Baseball Club | Product/Growth Operations — Apr 2025 - Aug 2025

- Coordinated cross-functional marketing timelines, promotional deliverables, and game-day activities to meet fixed inaugural-season event deadlines.
- Analyzed fan engagement, attendance, and event outcomes to identify effective promotions and inform audience-focused event decisions.
- Improved ticketing and event workflows, reducing processing inefficiencies by approximately **15%**.

Macfarlane Faletti & Co | Database Manager and Cloud Administrator — Mar 2023 - Aug 2024

- Diagnosed cloud/database bottlenecks affecting **150+ weekly clients**; translated stakeholder needs into improvements that reduced latency by approximately **20-30%**.
- Modernized legacy data-processing and access workflows, improving speeds by approximately **25%**; developed operational reporting and dashboard outputs.
- Resolved **22+ infrastructure issues**, improving reliability and continuity across business-critical client workflows.

Los Angeles Dodgers | Software Developer — Aug 2022 - Jan 2023

- Built a Python scouting analytics platform using statistical modeling and **100+ player variables** to support consistent player evaluation.
- Partnered with scouts on requirements, feature iterations, and reporting; helped reduce manual evaluation time by approximately **15-20%**.

Lanspeed | Services Engineer Intern — Jun 2021 - Aug 2021

- Supported IT systems for **50+ clients**, troubleshooting server, network, and workstation issues to restore reliable operations.
- Completed **30+ server backups** and communicated issue updates to clients, supporting business continuity and timely resolution.

SELECTED PROJECTS

PairName | *JavaScript, Supabase*

- Designed and built a mobile-first application with Supabase authentication, partner pairing, independent name swipes, mutual matching, undo, and persistent preferences.

Risky Business | *Python, pandas, NumPy*

- Co-developed a backtesting study of five portfolio strategies across nine market regimes; compared returns, volatility, Sharpe, and Sortino ratios.

U.S. Traffic Accident Dashboard | *R Shiny, Leaflet, Plotly*

- Built an interactive U.S. crash dashboard with national and county views, population-adjusted comparisons, roadway heatmaps, and time/weather filters.

EDUCATION

Willamette University | MBA; M.S. in Data Science — Aug 2026

Business & Technology Association President; Atkinson Student Association Treasurer

Whitman College | B.A. in Computer Science — Dec 2022

SKILLS

Product: Requirements gathering, feature iteration, stakeholder management, user workflows, product analytics, market research, process improvement.

Technical & data: Python, SQL, R, JavaScript, Supabase, PostgreSQL, Power BI, Tableau, Excel, statistical analysis, dashboards, cloud/database administration.
